Even before its completion in 1839, John James Audubon's *Birds of America* was recognized as a masterpiece of both art and natural science; a great scientist of the day called it the "most magnificent monument which has ever been raised to ornithology."

Roger Tory Peterson and Virginia Marie Peterson's modern edition of the *Birds of America*, published with the full endorsement and cooperation of the National Audubon Society, is itself an acknowledged classic. Now, for the first time, it is available as an e-book.

All 435 of Audubon's brilliant hand-colored engravings are presented in exquisite reproductions derived from the Audubon Society's own archival copy of the rare Double Elephant Folio. A generously illustrated introduction surveys Audubon's career, as well as the history of American bird art before and after him. Descriptive captions, hyperlinks to authoritative species profiles, and a new, scientifically based arrangement of the prints allow us to appreciate Audubon's achievement in the light of modern ornithology.
