Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series)

James Z. Wang

Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) James Z. Wang Content-based image retrieval is the set of techniques for retrieving relevant images from an image database on the basis of automatically derived image features. The need for efficient content-based image re trieval has increased tremendously in many application areas such as biomedicine, the military, commerce, education, and Web image clas sification and searching. In the biomedical domain, content-based im age retrieval can be used in patient digital libraries, clinical diagnosis, searching of 2-D electrophoresis gels, and pathology slides. I started my work on content-based image retrieval in 1995 when I was with Stanford University. The project was initiated by the Stan ford University Libraries and later funded by a research grant from the National Science Foundation. The goal was to design and implement a computer system capable of indexing and retrieving large collections of digitized multimedia data available in the libraries based on the media contents. At the time, it seemed reasonable to me that I should discover the solution to the image retrieval problem during the project. Experi ence has certainly demonstrated how far we are as yet from solving this basic problem.

From reader reviews:

Kimberly Gonzalez:

What do you concentrate on book? It is just for students because they're still students or that for all people in the world, what the best subject for that? Just simply you can be answered for that concern above. Every person has diverse personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great and important the book Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series). All type of book can you see on many resources. You can look for the internet options or other social media.

Therese Webb:

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not call for people to be aware of each info they get. How people have to be smart in acquiring any information nowadays? Of course the answer is reading a book. Studying a book can help persons out of this uncertainty Information specially this Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) book as this book offers you rich information and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it everbody knows.

Ronald Griffin:

Your reading 6th sense will not betray a person, why because this Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) guide written by well-known writer who really knows well how to make book which might be understand by anyone who also read the book. Written in good manner for you, leaking every ideas and producing skill only for eliminate your own hunger then you still skepticism Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) as good book not only by the cover but also by the content. This is one guide that can break don't evaluate book by its handle, so do you still needing one more sixth sense to pick that!? Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Sherry Fitzgerald:

That guide can make you to feel relax. This book Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) was colourful and of course has pictures on there. As we know that book Integrated Region-Based Image Retrieval: v. 11 (The Information Retrieval Series) has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and believe you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading in which.
