Real Variables with Basic Metric Space Topology (Dover Books on Mathematics) Robert B. Ash

Designed for a first course in real variables, this text presents the fundamentals for more advanced mathematical work, particularly in the areas of complex variables, measure theory, differential equations, functional analysis, and probability. Geared toward advanced undergraduate and graduate students of mathematics, it is also appropriate for students of engineering, physics, and economics who seek an understanding of real analysis.

The author encourages an intuitive approach to problem solving and offers concrete examples, diagrams, and geometric or physical interpretations of results. Detailed solutions to the problems appear within the text, making this volume ideal for independent study. Topics include metric spaces, Euclidean spaces and their basic topological properties, sequences and series of real numbers, continuous functions, differentiation, Riemann-Stieltjes integration, and uniform convergence and applications.

From reader reviews:

Robert Black:

Book is actually written, printed, or created for everything. You can realize everything you want by a guide. Book has a different type. As you may know that book is important matter to bring us around the world. Close to that you can your reading skill was fluently. A e-book Real Variables with Basic Metric Space Topology (Dover Books on Mathematics) will make you to end up being smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that open or reading a new book make you bored. It's not make you fun. Why they are often thought like that? Have you trying to find best book or suitable book with you?

John Charles:

What do you think about book? It is just for students since they're still students or it for all people in the world, the particular best subject for that? Just you can be answered for that issue above. Every person has several personality and hobby per other. Don't to be compelled someone or something that they don't wish do that. You must know how great as well as important the book Real Variables with Basic Metric Space Topology (Dover Books on Mathematics). All type of book would you see on many methods. You can look for the internet sources or other social media.

Timothy Bullock:

Is it you actually who having spare time subsequently spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Real Variables with Basic Metric Space Topology (Dover Books on Mathematics) can be the response, oh how comes? It's a book you know. You are consequently out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these books have than the others?

Chris Wolf:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or illustrated from each source in which filled update of news. With this modern era like now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the Real Variables with Basic Metric Space Topology (Dover Books on Mathematics) when you desired it?
