A Monograph of the Eocene Mollusca of England: Volume 2, A Monograph of the Eocene Bivalves of England (Cambridge Library Collection - Monographs of the Palaeontographical Society) Searles V. Wood

The Eocene sediments of the London and Hampshire basins in southern England are rich in fossil invertebrates, plants and vertebrates; in particular, they yield a great diversity of often well-preserved fossil mollusc shells. Seeking to provide a methodical treatment of known specimens, Frederick E. Edwards (1799-1875) and Searles V. Wood (1798-1880) had divided the workload of describing the Mollusca found in the English Tertiary formations, with Edwards taking the older formations and Wood the newer. When Edwards became ill, however, Wood took on the Eocene bivalves, yet he was unable to add much to the treatment of cephalopods and gastropods. Featuring detailed illustrations, the two volumes provide for each species a synonymy, diagnosis (in Latin), full description, dimensions, occurrence, and well-informed remarks. Volume 2 comprises Wood's Monograph of the Eocene Bivalves of England, originally published in three parts between 1861 and 1871. This reissue includes the 1877 supplement.
