Real Analysis and Applications (Undergraduate Texts in Mathematics)

Kenneth R. Davidson

Real Analysis and Applications (Undergraduate Texts in Mathematics) Kenneth R. Davidson

This new approach to real analysis stresses the use of the subject in applications, showing how the principles and theory of real analysis can be applied in various settings. Applications cover approximation by polynomials, discrete dynamical systems, differential equations, Fourier series and physics, Fourier series and approximation, wavelets, and convexity and optimization. Each chapter has many useful exercises. The treatment of the basic theory covers the real numbers, functions, and calculus, while emphasizing the role of normed vector spaces, and particularly of \mathbb{R}^n . The applied chapters are mostly independent, giving the reader a choice of topics. This book is appropriate for students with a prior knowledge of both calculus and linear algebra who want a careful development of both analysis and its use in applications. Review of the previous version of this book, *Real Analysis with Real Applications*: 'A well balanced book! The first solid analysis course, with proofs, is central in the offerings of any math.-dept.; ---and yet, the new books that hit the market don't always hit the mark: the balance between theory and applications, ---between technical proofs and intuitive ideas, ---between classical and modern subjects, and between real life exercises vs. the ones that drill a new concept. The Davidson-Donsig book is outstanding, and it does hit the mark.' Palle E. T. Jorgenson, Review from Amazon.com Kenneth R. Davidson is University Professor of Mathematics at the University of Waterloo. Allan P. Donsig is Associate Professor of Mathematics at the University of Nebraska-Lincoln.

From reader reviews:

Mary Bingham:

Are you kind of stressful person, only have 10 or 15 minute in your day to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you have problem with the book when compared with can satisfy your small amount of time to read it because this time you only find reserve that need more time to be examine. Real Analysis and Applications (Undergraduate Texts in Mathematics) can be your answer mainly because it can be read by an individual who have those short time problems.

Cory Kyle:

You may get this Real Analysis and Applications (Undergraduate Texts in Mathematics) by visit the bookstore or Mall. Only viewing or reviewing it can to be your solve trouble if you get difficulties for the knowledge. Kinds of this guide are various. Not only by means of written or printed but also can you enjoy this book through e-book. In the modern era including now, you just looking from your mobile phone and searching what your problem. Right now, choose your ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.

Ward Bishop:

That book can make you to feel relax. This specific book Real Analysis and Applications (Undergraduate Texts in Mathematics) was colorful and of course has pictures on there. As we know that book Real Analysis and Applications (Undergraduate Texts in Mathematics) has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book are make you bored, any it offers you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading that will.

Bernadine Parker:

Reading a book make you to get more knowledge from that. You can take knowledge and information from a book. Book is prepared or printed or created from each source this filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Real Analysis and Applications (Undergraduate Texts in Mathematics) when you desired it?
