Soft Computing for Image and Multimedia Data Processing

Siddhartha Bhattacharyya, Ujjwal Maulik

Soft Computing for Image and Multimedia Data Processing Siddhartha Bhattacharyya, Ujjwal Maulik

Proper analysis of image and multimedia data requires efficient extraction and segmentation techniques. Among the many computational intelligence approaches, the soft computing paradigm is best equipped with several tools and techniques that incorporate intelligent concepts and principles. This book is dedicated to object extraction, image segmentation, and edge detection using soft computing techniques with extensive real-life application to image and multimedia data.

The authors start with a comprehensive tutorial on the basics of brain structure and learning, and then the key soft computing techniques, including evolutionary computation, neural networks, fuzzy sets and fuzzy logic, and rough sets. They then present seven chapters that detail the application of representative techniques to complex image processing tasks such as image recognition, lighting control, target tracking, object extraction, and edge detection. These chapters follow a structured approach with detailed explanations of the problems, solutions, results, and conclusions.

This is both a standalone textbook for graduates in computer science, electrical engineering, system science, and information technology, and a reference for researchers and engineers engaged with pattern recognition, image processing, and soft computing.

From reader reviews:

Albertha Lemons:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each reserve has different aim as well as goal; it means that publication has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are reading whatever they take because their hobby is actually reading a book. Consider the person who don't like reading through a book? Sometime, particular person feel need book whenever they found difficult problem or maybe exercise. Well, probably you will require this Soft Computing for Image and Multimedia Data Processing.

Erica Futch:

The book Soft Computing for Image and Multimedia Data Processing can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book Soft Computing for Image and Multimedia Data Processing? Some of you have a different opinion about reserve. But one aim in which book can give many info for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or facts that you take for that, you may give for each other; you can share all of these. Book Soft Computing for Image and Multimedia Data Processing has simple shape however, you know: it has great and big function for you. You can seem the enormous world by start and read a book. So it is very wonderful.

Ola Hellman:

This book untitled Soft Computing for Image and Multimedia Data Processing to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit on it. You will easily to buy this particular book in the book store or you can order it by way of online. The publisher on this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Cell phone. So there is no reason for you to past this reserve from your list.

Carolyn Lew:

You could spend your free time you just read this book this book. This Soft Computing for Image and Multimedia Data Processing is simple to develop you can read it in the playground, in the beach, train as well as soon. If you did not get much space to bring the particular printed book, you can buy the particular e-book. It is make you easier to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
