New Advances in Intelligence and Security Informatics (Intelligent Systems) Wenji Mao, FeiYue Wang

The Intelligent Systems Series comprises titles that present state of the art knowledge and the latest advances in intelligent systems. Its scope includes theoretical studies, design methods, and real-world implementations and applications.

Traditionally, Intelligence and Security Informatics (ISI) research and applications have focused on information sharing and data mining, social network analysis, infrastructure protection and emergency responses for security informatics. With the continuous advance of IT technologies and the increasing sophistication of national and international security, in recent years, new directions in ISI research and applications have emerged to address complicated problems with advanced technologies. This book provides a comprehensive and interdisciplinary account of the new advances in ISI area along three fundamental dimensions: methodological issues in security informatics; new technological developments to support security-related modeling, detection, analysis and prediction; and applications and integration in interdisciplinary socio-cultural fields.

- Identifies emerging directions in ISI research and applications that address the research challenges with advanced technologies
- Provides an integrated account of the new advances in ISI field in three core aspects: methodology, technological developments and applications
- Benefits researchers as well as security professionals who are involved in cutting-edge research and applications in security informatics and related fields

From reader reviews:

William Reynolds:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each book has different aim as well as goal; it means that publication has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they get because their hobby will be reading a book. Consider the person who don't like reading through a book? Sometime, man or woman feel need book when they found difficult problem or perhaps exercise. Well, probably you will want this New Advances in Intelligence and Security Informatics (Intelligent Systems).

Sophia Whitfield:

Often the book New Advances in Intelligence and Security Informatics (Intelligent Systems) has a lot info on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research before write this book. This book very easy to read you may get the point easily after reading this article book.

Michael Hilton:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV the whole day. You can have new activity to pay your whole day by studying a book. Ugh, ya think reading a book will surely hard because you have to bring the book everywhere? It okay you can have the e-book, having everywhere you want in your Smartphone. Like New Advances in Intelligence and Security Informatics (Intelligent Systems) which is obtaining the e-book version. So , why not try out this book? Let's find.

Kristopher Lewis:

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just laying on the bed? Do you need something totally new? This New Advances in Intelligence and Security Informatics (Intelligent Systems) can be the reply, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these books have than the others?
