Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science)

Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science)

DATA ENGINEERING: Mining, Information, and Intelligence describes applied research aimed at the task of collecting data and distilling useful information from that data. Most of the work presented emanates from research completed through collaborations between Acxiom Corporation and its academic research partners under the aegis of the Acxiom Laboratory for Applied Research (ALAR). Chapters are roughly ordered to follow the logical sequence of the transformation of data from raw input data streams to refined information. Four discrete sections cover Data Integration and Information Quality; Grid Computing; Data Mining; and Visualization. Additionally, there are exercises at the end of each chapter.

The primary audience for this book is the broad base of anyone interested in data engineering, whether from academia, market research firms, or business-intelligence companies. The volume is ideally suited for researchers, practitioners, and postgraduate students alike. With its focus on problems arising from industry rather than a basic research perspective, combined with its intelligent organization, extensive references, and subject and author indices, it can serve the academic, research, and industrial audiences.

From reader reviews:

Paul Blum:

Throughout other case, little men and women like to read book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science). You can choose the best book if you like reading a book. So long as we know about how is important some sort of book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science). You can add expertise and of course you can around the world by way of a book. Absolutely right, simply because from book you can realize everything! From your country till foreign or abroad you will end up known. About simple point until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's examine.

Virginia Scheffer:

What do you concentrate on book? It is just for students because they're still students or this for all people in the world, the actual best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for each and every other. Don't to be compelled someone or something that they don't desire do that. You must know how great and important the book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science). All type of book is it possible to see on many options. You can look for the internet methods or other social media.

Tami Anders:

Typically the book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science) will bring one to the new experience of reading any book. The author style to describe the idea is very unique. Should you try to find new book to read, this book very suitable to you. The book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science) is much recommended to you to read. You can also get the e-book from your official web site, so you can easier to read the book.

Linda Bryant:

A lot of e-book has printed but it differs from the others. You can get it by web on social media. You can choose the most effective book for you, science, comedian, novel, or whatever simply by searching from it. It is named of book Data Engineering: Mining, Information and Intelligence: 132 (International Series in Operations Research & Management Science). You can add your knowledge by it. Without leaving the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about book. It can bring you from one destination for a other place.
