Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series)

Jack Challoner

With the pace of current development in consumer electronics, it is tempting to picture a future in which everyone carries miniature gadgets whose batteries never run out, and which inform, entertain, translate, communicate, memorise and organise. Is this a realistic picture... or is the future of consumer electronics threatened by factors such as climate change, global politics and, of course, people's continued willingness to 'buy into' the modern world?

In *Desirable Future*? Jack Challoner takes a thought-provoking look at this powerful industry. He describes the technologies - such as new power supplies, increased miniaturisation, and convergence - that will drive it forward, and looks at the role that artificial intelligence and speech recognition will play. He asks whether the current rate of progress is sustainable, or whether the industry is heading for a state of collapse... He raises some fascinating issues along the way, such as:

- Will you ever be able to have intelligent conversations with your gadgets?
- Will we have to keep buying new formats for films and music?
- How many obsolete mobile phones and chargers do you have?
- Can you only afford new gadgets when they're already going out of fashion?
- Is built-in obsolescence a commercial strategy or a necessity?

If you're someone who can't make it through the day without your mobile phone, PDA, MP3 player etc, then this book will give you some food for thought about how we became such a gadget-obsessed society and what the future holds...

About the author

Jack has written nearly 30 books for children, teenagers and adults. In addition he often acts as consultant science editor for books, magazines, science activity packs and CD-ROMs. He also presents live science shows in museums, schools and libraries.

From reader reviews:

Herman Deans:

Information is provisions for folks to get better life, information today can get by anyone from everywhere. The information can be a expertise or any news even a huge concern. What people must be consider when those information which is within the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you have the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series) as your daily resource information.

Myrtle Brown:

Typically the book Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series) will bring you to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book you just read, this book very acceptable to you. The book Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series) is much recommended to you you just read. You can also get the e-book from your official web site, so you can quicker to read the book.

Justin Perry:

In this time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Typically the book that recommended to you personally is Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series) this e-book consist a lot of the information on the condition of this world now. That book was represented so why is the world has grown up. The language styles that writer use for explain it is easy to understand. The particular writer made some exploration when he makes this book. Here is why this book suited all of you.

Michele Fernandez:

In this particular era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become considered one of it? It is just simple way to have that. What you should do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top listing in your reading list is actually Desirable Future: Consumer Electronics in Tomorrow's World (Science Museum TechKnow Series). This book and that is qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking up and review this e-book you can get many advantages.
