Architectures of Economic Subjectivity: The Philosophical Foundations of the Subject in the History of Economic Thought (Routledge Frontiers of Political Economy) Sonya Scott

The history of European economic thought has long been written by those seeking to prove or disprove the truth-value of the theories they describe. This work takes a different approach. It explores the philosophical groundwork of the theoretical structure within which economic subjects are presented. Demonstrating how the subjects of economic texts tend to be defined in and through their relationship to knowledge, this study addresses the epistemological constitution of subjectivity in economic thought.
