Statistical Methods Rudolf J. Freund, Donna Mohr, William J. Wilson

Statistical Methods, 3e provides students with a working introduction to statistical methods offering a wide range of applications that emphasize the quantitative skills useful across many academic disciplines. This text takes a classic approach emphasizing concepts and techniques for working out problems and interpreting results. The book includes research projects, real-world case studies, numerous examples and data exercises organized by level of difficulty. This text requires that a student be familiar with algebra.

New to this edition:

- NEW expansion of exercises applying different techniques and methods
- NEW examples and datasets using current real-world data
- New text organization to create a more natural connection between regression and the Analysis of the Variance
- NEW material on generalized linear models
- NEW expansion of nonparametric techniques
- NEW student research projects
- NEW case studies for gathering, summarizing, and analyzing data

Supplements:

- NEW companion website with downloadable data sets and additional resources including live links to statistical software such as SAS and SPSS
 - Student Solutions Manual - to come
 - Instructor Manual - to come
 - Sample chapter - <http://www.elsevierdirect.com/product.jsp?isbn=9780123749703>
-
- Integrates the classical conceptual approach with modern day computerized data manipulation and computer applications
 - Accessible to students who may not have a background in probability or calculus
 - Offers reader-friendly exposition, without sacrificing statistical rigor
 - Includes many new data sets in various applied fields such as Psychology, Education, Biostatistics, Agriculture, Economics
