Building a Quadcopter with Arduino

Vasilis Tzivaras

Building a Quadcopter with Arduino

Vasilis Tzivaras

Building a Quadcopter with Arduino Vasilis Tzivaras

Key Features

- Grasp the knowledge required to assemble your drone with light and cost effective materials
- Enlighten your understanding about the flight by performing step-by-step pre-flight adjustments and acquiring the instructions for a safe flight
- Get the best tips to deal with performance issues related to your quadcopter

Book Description

Quadcopters, also known as quadrotors, are gaining more and more popularity in today's world. With the help of these devices, anyone can have an "eye in the sky" and can monitor any place at any time. You can capture photographs and once a while and perform automated tasks. In this book, you will be informed about all the basic modules and electronics needed to fly a simple quadcopter. You'll delve deep to create a fully-functional quadcopter quickly with the help of Arduino boards. Through this book, you'll develop the skills needed to build a DIY drone that can capture pictures and record videos.

What you will learn

- Review and choose the most suitable material for the build
- Set up and calibrate all of your electronic parts
- Control and fly your quadcopter taking into account the weather conditions
- Maintain your vehicle as much as possible and repair it whenever required
- Engineer the structure of your vehicle
- Develop a flight controller with its basic principles
- Eliminate possible malfunctions in the future
- Repair your drone if it crashes or faces any damage

About the Author

Vasilis Tzivaras is a software developer and hardware engineer who lives in Ioannina, Greece. He is currently an undergraduate student of the Department of computer science and Engineering at Ioannina. Alongside his studies, he is working on many projects relevant to robotics, such as drones, home automation, and smart home systems using Arduino and the Raspberry Pi. Furthermore, he is enthusiastic about clean energy solutions and cultural innovation ideas.

He has worked for the University Hospital of Ioannina as an assistant for various computer issues, and he has been part of the support team of his CSE department for over a year. He has participated in IEEE UOI Student Branch and other big organizations, such as FOSSCOMM, with personal presentations for website designing, programming, Linux systems, and drones.

As a member of IEEE University of Ioannina Student Branch, he has proposed many projects and solutions to automate homes and many other life problems by reducing the time of everyday routines. In addition to this, he has come up with ideas to entertain kids with funny and magical projects using Arduino-like hardware and open source software. Many of the projects can be found at his GitHub account under the name

of BillyTziv.

Apart from this book, he has also worked on another book Programming in C, which is not yet published. In addition to this, he has written for blogs, forums, guides, and small chapters, explaining and sharing his knowledge of computers, networks, and programming.

Table of Contents

1. Introduction to Quadcopters
2. Hardware Overview
3. Creating a Frame
4. Soldering the Electronics
5. Electronics Installation
6. Flight Controller Setup
7. Flight Instructions
8. Cameras and Extra Functions
9. Repair and Maintenance

From reader reviews:

Robert Leggett:

Book is usually written, printed, or descriptive for everything. You can learn everything you want by a reserve. Book has a different type. As you may know that book is important issue to bring us around the world. Next to that you can your reading expertise was fluently. A publication Building a Quadcopter with Arduino will make you to always be smarter. You can feel much more confidence if you can know about almost everything. But some of you think in which open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you looking for best book or appropriate book with you?

Barbara Morton:

What do you with regards to book? It is not important along with you? Or just adding material if you want something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everybody has many questions above. They need to answer that question due to the fact just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need that Building a Quadcopter with Arduino to read.

Willie Alford:

You can spend your free time you just read this book this guide. This Building a Quadcopter with Arduino is simple bringing you can read it in the park your car, in the beach, train along with soon. If you did not have got much space to bring the particular printed book, you can buy often the e-book. It is make you much easier to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Chantal Dow:

Don't be worry if you are afraid that this book may filled the space in your house, you might have it in e-book technique, more simple and reachable. This specific Building a Quadcopter with Arduino can give you a lot of close friends because by you taking a look at this one book you have thing that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't understand, by knowing more than various other make you to be great people. So , why hesitate? We should have Building a Quadcopter with Arduino.
