Prosody in Speech Understanding Systems (Lecture Notes in Computer Science) Ralf Kompe

Speech technology, the automatic processing of (spontaneously) spoken language, is now known to be technically feasible. It will become the major tool for handling the confusion of languages with applications including dictation systems, information retrieval by spoken dialog, and speech-to-speech translation. The book gives a thorough account of prosodic phenomena. The author presents in detail the mathematical and computational background of the algorithms and statistical models used and develops algorithms enabling the exploitation of prosodic information on various levels of speech understanding, such as syntax, semantics, dialog, and translation. Then he studies the integration of these algorithms in the speech-to-speech translation system VERBMOBIL and in the dialog system EVAR and analyzes the results.

From reader reviews:

Connie Sims:

Information is provisions for those to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider whenever those information which is from the former life are challenging be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Prosody in Speech Understanding Systems (Lecture Notes in Computer Science) as the daily resource information.

Robert Glass:

In this period of time globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is Prosody in Speech Understanding Systems (Lecture Notes in Computer Science) this reserve consist a lot of the information in the condition of this world now. This specific book was represented how do the world has grown up. The dialect styles that writer require to explain it is easy to understand. Typically the writer made some analysis when he makes this book. That's why this book ideal all of you.

Kimberly Williams:

Is it a person who having spare time then spend it whole day simply by watching television programs or just lying on the bed? Do you need something new? This Prosody in Speech Understanding Systems (Lecture Notes in Computer Science) can be the solution, oh how comes? A fresh book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?

Martha Williams:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from the book. Book is written or printed or descriptive from each source in which filled update of news. On this modern era like currently, many ways to get information are available for anyone. From media social such as newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just trying to find the Prosody in Speech Understanding Systems (Lecture Notes in Computer Science) when you essential it?
