Children and Migration: At the Crossroads of Resiliency and Vulnerability

Children and Migration offers a comprehensive analysis of the increasingly common phenomenon of child migration from the perspective of the children themselves. Situating child migration at the nexus of resiliency and vulnerability, the volume focuses on the local conditions that frame child migrants' lives as well as analyzes the broader issues of poverty, (under)development, conflict, and displacement that mark the movement of children within and across national borders.

Acknowledging that migrant children do not speak with one single voice, this volume bears testimony to the enormous diversity and multifaceted character of child migration. Drawing on rich ethnographic data as well as quantitative surveys, the book examines the experiences of children in a wide variety of migratory circumstances including economic child migrants, transnational students, trafficked, stateless, fostered, unaccompanied and undocumented children. This collection addresses theoretical, methodological and ethical considerations of research with migrant children, and analyze aspects of health, education, work, kinship and gender issues, as well as the special circumstances presented by forced migration.
